**Response to Office Action**

This relates to Application/Continuation Number 10/605,663, Bookstand that Folds Thin Enough to Serve as a Bookmark filed October 16, 2003.

It is in response to office action dated September 12, 2005.

In talking to the examiner Gwendolyn Baxter, it was clearly pointed out to me that I needed to fix the numbers in the diagrams that referred to the elements of the diagram. Therefore I have fixed the numbers inside the 9 diagrams to make them consistent, as per her recommendation.

She also said I should fix the disclosure to make the numbers consistent with the diagrams, which I have done.

She suggested a claim, that I would like to discuss with her further. In the meantime, I wanted to make this response timely.
